

FreshFold

- ✓ Salad Harvest
- ✓ Long Distance Salad Shipping

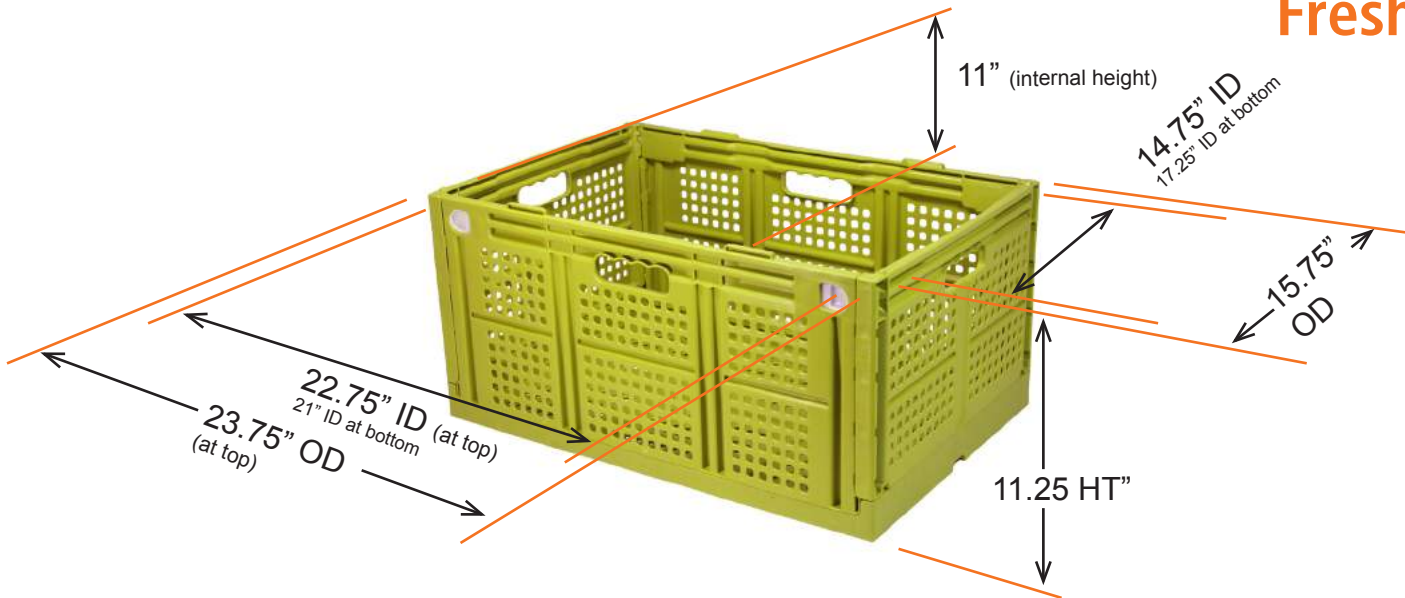

FreshFold is an RPC expressly designed for salad. Better volume utilization when packed, and 10% more efficient empty return improve the economics of shipping salad over large distances. Smooth contoured edges and vent holes inside and out make it more comfortable for workers and kinder to the salad. Simple, finger-friendly, intuitive open and closing make it a great choice for harvest and packing crews.

METAL DETECTABLE

- Maximum efficiency for empty return - up to 660 extra empties per truck when folded down
- Extra internal volume to ship more product
- Function - easy and fast to open and close
- Hand shaped handles and finger-friendly latches
- Effective cleaning and sanitizing
- Smooth inside and out - gentle on your salad and smoother movement with machinery
- Great aesthetics
- No exposed ribs - easier to clean and more resistant to impact
- Color choices - use color for operational simplicity and to protect your assets
- Metal detection - our FDA food grade, proprietary, proven blend, allows plastic debris to be detected by most metal detectors used in fresh cut operations.
- Compatible with other 6428 RPCs
